

DAVIES & LEED CI

MATERIALS & RESOURCES

MR 2.1	Construction Waste Management	Divert 50% from landfill	Intent: Divert debris from landfill disposal. Redirect recyclable resources to the manufacturing process or appropriate sites.
MR 2.2			
MR 3.3	Resource Re-Use	30% Furniture and Furnishings	Intent: Use salvaged, refurbished or used furniture to reduce the demand for virgin materials & reduce waste.
MR 4.1	Recycled Content	10% (post-consumer + 1/2 pre-consumer)	Intent: Increase demand for building products that incorporate recycled content materials.
MR 4.2		20% (post-consumer + 1/2 pre-consumer)	
MR 5.1	Regional Materials	20% Manufactured Regionally	Intent: Increase demand for products within the region and reducing the environmental impacts of transportation

ENVIRONMENTAL QUALITY

EQ 4.5	Low Emitting Materials/Systems Furniture & Seating		Intent: Reduce quantity of indoor air contaminants by specifying systems furniture that have been manufactured, refurbished or refinished within 1 year that meet air LEED air quality guidelines.
EQ 8.1	Daylight & Views	Daylight 75% of spaces	Intent: Provide the building occupants with a connection between the indoor spaces and the outdoors with daylight and views for the regularly occupied areas.
EQ 8.2	Daylight & Views	Daylight 90% of spaces	
EQ 8.3	Daylight & Views	Views 90% of seated spaces	
INNOVATION IN DESIGN		Intent: Provide an opportunity for design teams & projects for exceptional performance above the LEED rating system and/or categories not specifically addressed by the rating system	

DAVIES CAN...

- Collect plastic bags our panels are wrapped in and return to Davies for re-use
- Segregate cardboard used in packaging our furniture and recycle locally or return to Davies for recycling or re-use
- Blanket wrapping our product for shipment
- Remove customer's existing furniture to Davies banking or product exchange programs
- Assist the re-deployment of customer's existing furniture from on-site, other locations or storage
- Supply as-is product from Davies stock
- Recommend & provide new products that meet the recycled content required
Consider fabrics made from PLA material or other natural fibers
- Consider using linoleum or other renewable materials instead of laminate
- Recommend & provide new products that meet the EQ requirement and documentations
- Integrate lower panels as part of the systems furniture design
- Include glass panels as part of the systems furniture design
